Overview

High-Performance Modular Conveyor Belt

The HS-8000A-RC is a high-performance modular plastic conveyor belt engineered for demanding logistics and material handling environments. It features a durable, modular design that supports easy maintenance and customization, with a maximum load capacity of up to 1.2 tons per square meter. Compliant with international food safety standards, this belt offers versatile application across industries ranging from food processing to automotive manufacturing.

Technical Specifications

Model Type	HS-8000A-RC
Belt Thickness	14-17mm
Minimum Width	100 mm
Open Area	0 %
Rod Diameter	6 mm
Working Temperature	-40°C to 260°C
Curve Capable	Yes

Design Features

Flight & Side Guard

- Flight: No
- Side Guard: No

Available Materials	PP, POM, PE, PA
Available Colors	White, Blue, Gray, Nature, Dark-brown
Sprocket Configuration	12T; Square and Round Bore options

Performance Metrics

Maximum Load Capacity

1.2 tons/m²

Max Load

Compliance & Applications

Certifications

FDA Approved • EU Approved

Industry Applications

Sector	Industries
Food	Meat, Poultry, Seafood, Bakery, Snack Food, Fruit & Vegetables
Non-Food	Automotive, Packaging, Printing, Textile, Postal, Manufacturing
