

Modular Recycled Rubber Speed Bump Kit

This modular rubber speed bump kit reduces vehicle speeds in parking lots and school zones. Constructed from recycled rubber, it resists weather, oil, salt, and UV damage and includes reflectors for enhanced visibility.

Product Overview

Modular Traffic Calming Solution

This modular speed bump kit is expertly engineered to effectively reduce vehicle speeds in high-traffic areas such as parking lots, school zones, and residential streets. Constructed from high-durability recycled rubber, the product offers exceptional resistance to harsh weather conditions, oil, salt, and UV damage. Its interlocking design facilitates easy installation and customization to suit various road widths, ensuring a secure and stable surface for long-term use.

Technical Specifications

Dimensions (per section)

200 mm

Width

500 mm

Length

50 mm

Height

Weight per section

5 kg

Material

Recycled Rubber

Color

Black with yellow reflective stripes

Installation and Compatibility

Surface Compatibility

Asphalt, Concrete

Mounting Hardware Included

Yes

Safety and Durability

Environmental Resistance

- Weather resistant
- Oil resistant
- Salt resistant
- UV resistant

Visibility Features

Integrated Reflectors • High-Visibility Yellow
