## Product Overview

### Modular Roller Top 400 Conveyor Belt

The Modular Roller Top 400 belt is a high-performance solution designed for efficient, low-friction material handling. Its versatile design features integrated rollers that facilitate smooth product alignment and transport, making it an ideal choice for automated systems. Constructed for durability and ease of assembly, this interlocking conveyor section is widely utilized across industries such as tire manufacturing, carton packaging, and general assembly lines.

## Technical Specifications

### Friction Profile

Low Friction

### Roller Color

Blue

### Body Material

Durable Plastic

### Suitable Industries

Tire Manufacturing, Carton Packaging, Food Processing, Assembly Lines

## Design Features

### Design Characteristics

- Interlocking modular assembly
- Integrated roller housings
- Slotted design for flexibility and ventilation
- Toothed edge for positive drive engagement
