

Modular Unitized Curtain Wall System

This unitized curtain wall system features modular construction and reflective glass panels. It incorporates integrated windows and architectural elements, designed for efficient installation and weather resistance.

Product Overview

Modular Unitized Curtain Wall System

This modular unitized curtain wall system is engineered for high-rise commercial and residential architecture, offering a perfect blend of modern aesthetics and structural integrity. Featuring pre-assembled units, the system ensures rapid on-site installation and superior weather resistance. It is an ideal solution for projects requiring large-scale glass cladding with consistent quality and performance across the entire building facade.

Technical Specifications

Key Performance Indicators

- Enhanced weather resistance
- Rapid assembly and installation
- Reflective glass panel integration
- Architectural modularity

Construction Method	Modular Unitized
---------------------	------------------

Application

Ideal Applications	High-rise Commercial, Residential Towers, Modern Facades
