

# Molded Case Circuit Breaker

Molded case circuit breakers are designed for circuit protection in industrial applications. They are available in 3-pole and 4-pole configurations with current ratings of 100A and 250A.

## Product Overview

### Industrial Circuit Protection

The NF-SS series molded case circuit breakers are engineered for robust circuit protection in demanding industrial environments. Available in both 3-pole and 4-pole configurations, these units provide reliable overcurrent protection for various electrical systems. Their versatile design makes them an essential component for maintaining safety and operational continuity in professional electrical installations.

## Technical Specifications

### Rated Current Options

<b>100 A</b> Current Rating	<b>250 A</b> Current Rating
