

Molded Case Circuit Breaker

This molded case circuit breaker is designed for AC power systems. It is rated for AC 600V max at 50Hz and suitable for operation up to 40°C.

Product Overview

Reliable Circuit Protection

This molded case circuit breaker is engineered for robust performance in demanding AC power systems. Designed for industrial and commercial environments, it provides essential circuit protection with high interrupt capacity. Its durable construction ensures reliable operation in temperatures up to 40°C, making it a dependable choice for critical infrastructure.

Electrical Ratings

Interrupt Capacity

Voltage (AC)	Capacity
380V	35kA
480V	25kA
600V	18kA

Maximum Voltage	600 V
Operating Frequency	50/60 Hz

Compliance & Standards

Compliance Standards	KC 157-1, IIL 489
----------------------	-------------------

Environmental & Operational

Maximum Operating Temperature	40 °C
-------------------------------	-------

Application

Suitable Applications

- Industrial Power Systems
- Commercial Electrical Infrastructure
