

Molded Fiber Bowl for Food Service

This molded fiber bowl is designed for single-use food service applications. Its biodegradable construction makes it an environmentally conscious alternative to traditional plastic or styro-foam.

Product Overview

Eco-Friendly Food Service Solution

This molded fiber bowl offers a sustainable, single-use alternative to traditional plastic or styrofoam food service containers. Crafted from recycled paper or plant fibers, it features a smooth interior for food safety and a textured exterior for improved grip. Its lightweight, stackable design and insulating properties make it an ideal choice for businesses prioritizing environmentally conscious operations without sacrificing functionality.

Material & Sustainability

Material Composition	Recycled paper or plant fibers
Sustainability Features	Biodegradable, Recycled Material, Single-use

Design & Utility

Design Features

- Smooth interior surface
- Textured exterior for grip
- Flared rim for easy handling
