

Monaural Communication Headset

The HS-660 headset is designed for clear audio and comfortable wear. It features a flexible microphone boom for precise voice capture and a single earcup design for environmental awareness.

Product Overview

Professional Monaural Headset

The HS-660 is a dedicated communication headset engineered for clear audio transmission and long-term comfort. Designed with a single earcup, it provides focused audio input and output while allowing the user to remain aware of their surrounding environment. This versatile device is ideal for call centers, voice-over-IP services, and other professional communication applications.
