

Monitor Angle Adjustment Wedge

This wedge-shaped stand adjusts the viewing angle of a monitor. It is constructed from a rigid material and features a recessed area to accommodate the monitor's base, providing a stable and adjustable platform for optimal ergonomic positioning.

Product Overview

Ergonomic Monitor Support

The Monitor Angle Adjustment Wedge is a specialized accessory designed to enhance workplace ergonomics by optimizing the viewing angle of your display. Constructed from durable, rigid materials, this wedge provides a stable base that helps reduce screen glare and neck strain. Its thoughtful design features a recessed top surface, ensuring seamless compatibility with various monitor stands and bases for improved user comfort.
