

Monitor Chassis for 25-29 inch Displays

This is a chassis designed for 25 to 29 inch monitors. The electronic board contains resistors, capacitors, integrated circuits, and connectors for controlling and powering monitor functions.

Product Overview

High-Performance Monitor Chassis

This monitor chassis is specifically designed for 25-inch to 29-inch CRT displays, providing a comprehensive electronic control solution. The board integrates high-quality resistors, capacitors, and integrated circuits to ensure stable performance and reliable power management. Equipped with various wiring harnesses for power and signal connections, it offers a versatile interface for display integration.

Technical Specifications

Display Compatibility

25 inch Min Display Size	29 inch Max Display Size
------------------------------------	------------------------------------

Integrated Components

- Resistors
- Capacitors
- Integrated Circuits
- Connectors

Interface & Connectivity

Power Harnesses, Signal Connections, CRT Interface

Design & Build

Primary Application

CRT Monitor Control • Power Management

Mounting Type

Non-conductive surface mount
