

Monitor Display Component

This is a component for a monitor or display device. It enables adjustable positioning or attachment to a stand or wall mount.

Product Overview

Monitor Display Component JBA-311E

The JBA-311E is a specialized monitor display component designed for secure and flexible mounting applications. Engineered for reliability, this support arm or bracket facilitates optimal positioning of display devices within a professional workstation or wall-mounted setup. Its robust construction ensures stability, making it an essential hardware piece for integrated display systems.

Technical Details

Model Number	JBA-311E
Component Type	Mounting bracket / Support arm
Primary Application	Monitor Mounting, Display Support, Workstation Ergonomics
