

Mono-Crystalline Solar Panel Module

This mono-crystalline solar panel module is designed for solar power generation. It features durable construction and optimized energy conversion for reliable performance.

Overview

High-Efficiency Solar Power Generation

This mono-crystalline silicon module is engineered for optimal energy conversion and reliable performance across diverse environmental conditions. Designed for versatility, it is suitable for residential, commercial, and industrial solar power applications. The module prioritizes maximum power output and long-term structural stability for sustainable energy projects.

Performance Metrics

Power Output Range

235 W

Minimum Power

265 W

Maximum Power

Technical Details

Cell Technology	Mono-Crystalline Silicon
Model Series	JAM6 60

Applications

Suitable Applications	Residential, Commercial, Industrial
-----------------------	-------------------------------------
