

# Monocrystalline Solar Panel with Half-Cut Cells 355-370W

Monocrystalline solar panel features half-cut cell technology for enhanced performance. This panel delivers a power output ranging from 355W to 370W and is ideal for various solar power systems.

## ADDITIONAL IMAGES

## Product Overview

### High-Efficiency Solar Solution

This monocrystalline solar panel utilizes advanced half-cut cell technology to enhance performance and durability across residential, commercial, and industrial applications. By reducing internal resistance and improving shading tolerance, the panel ensures optimal energy yield and minimizes the risk of hot spot effects. Its robust design is built to withstand harsh environmental conditions, providing a reliable and sustainable energy output ranging from 355W to 370W.

## Technical Specifications

### Power Output Range

**355 W**

Minimum Power

**370 W**

Maximum Power

### Cell Technology

Monocrystalline, Half-cut Cells

## Key Features

### Advantages

- Reduced internal resistance
- Improved shading tolerance
- Enhanced durability in harsh environments
- Minimized hot spot effects

## Application

### Recommended Uses

Residential • Commercial • Industrial • Utility-scale
