Product Overview

Extended Reach Precision Drilling

This high-speed steel (HSS) drill bit is engineered with a morse taper shank, ensuring secure and accurate mounting in machine tools. Its extended length design offers superior reach for deep-hole drilling and accessing recessed areas. The optimized twist geometry facilitates efficient chip removal, minimizing heat buildup during operation for consistent performance across steel, aluminum, and plastic materials.

Technical Specifications

Material	High-Speed Steel (HSS)
Shank Type	Morse Taper
Surface Finish	Bright, TiN

Application

Compatible Materials

- Steel
- Aluminum
- Plastic

Key Features

Extended Length • Efficient Chip Removal • Heat Reduction Design
