Product Overview

Professional Morse Taper Shank Twist Drills

These high-speed steel twist drill bits feature a robust Morse taper shank design, engineered for efficient and reliable drilling across a variety of industrial materials. Available in both Titanium Nitride (TIN) coated and bright finishes, they cater to diverse operational needs. The TIN coating significantly increases surface hardness and wear resistance, extending tool longevity, while the bright finish serves as a versatile, general-purpose solution.

Technical Specifications

Finish Performance

Finish	Primary Benefit
TIN Coated	Increased surface hardness and wear resistance
Bright Finish	General-purpose versatility

Shank Type	Morse Taper
Material	High-Speed Steel
Available Finishes	TIN Coated, Bright Finish
