

Mortar Removal Tuck Point Blade

This blade is designed for mortar removal and concrete applications. It is suitable for both dry and wet cutting, offering fast and efficient removal of mortar joints in brick, block, and stone for exterior building surfaces, interior floors, and walls.

Product Overview

Professional Mortar Removal

This sandwich tuck point blade is engineered for high-performance removal of mortar joints in brick, block, and stone. Its segmented rim incorporates diamond abrasives to ensure fast and efficient material removal while maintaining clean cut lines. The specialized sandwich design enhances structural stability, effectively reducing vibrations during operation to prolong tool longevity for professional contractors.

Technical Specifications

Dimensions and Compatibility

Model	Segment Height (mm)	Segment Width (mm)	Arbor (mm)
TPB105	10	9.5	22.23
TPB115	10	9.5	22.23
TPB125	10	9.5	22.23
TPB180	10	9.5	22.23

Suitable Materials

Brick, Block, Stone
