

Mortising and Tenoning Woodworking Machine

This woodworking machine is designed for precision mortising and tenoning tasks. It features a robust cast iron construction, adjustable work table, powerful motor, and pneumatic clamping system.

Product Overview

Precision Woodworking Performance

This robust woodworking machine is specifically engineered for high-precision mortising and tenoning operations. Featuring a heavy-duty cast iron construction, it ensures maximum stability and vibration dampening during intense material removal. The integrated pneumatic clamping system provides secure workpiece holding, making it an ideal choice for professional woodworking shops and precision furniture manufacturers.

Technical Specifications

Model Identifier	MX-3515
Construction Material	Cast Iron

Key Features

Clamping Mechanism	Pneumatic
Primary Operations	Mortising, Tenoning

Operational Controls

Table Configuration	Yes
