

Mortising Machine for Woodworking

This mortising machine is a precision woodworking tool used for creating mortise joints. It features a robust construction and a powerful motor for accurate cuts in various wood types.

Overview

Precision Mortising Performance

The Mortising Machine W8-M16 is a precision woodworking tool engineered for creating accurate and efficient mortise joints. It features a robust construction for stability and consistent performance, making it suitable for both professional woodworkers and hobbyists. Equipped with a powerful motor and an adjustable hold-down system, it ensures clean, precise cuts and secure workpiece positioning.

Technical Specifications

Motor Speed (50Hz)	1400 RPM
Motor Speed (60Hz)	1720 RPM

Key Features

Construction Robust Design • Durable Build	
Capabilities	Precision Mortising, Adjustable Fence, Hold-down System, Ergonomic Handle
