

Motion Activated LED Night Light

This motion-activated LED night light is designed for indoor use. It features a passive infrared (PIR) sensor that automatically turns the light on and off based on motion detection.

Product Overview

Smart Motion-Activated Illumination

This motion-activated LED night light is designed for efficient, hands-free illumination in indoor environments. Featuring a built-in passive infrared (PIR) sensor, it automatically detects movement to turn on and off, providing convenience and energy efficiency. Housed in a durable plastic casing with a soft, translucent cover, it delivers diffused light perfect for hallways, bedrooms, and bathrooms.

Technical Specifications

Sensor Technology	Passive Infrared (PIR)
Illumination Style	Diffused

Design & Build

Casing Material	Durable Plastic
Recommended Usage	Indoor, Hallways, Bedrooms, Bathrooms

Key Features

Core Features

- Automatic motion detection
- Passive Infrared (PIR) sensor
- Automatic On/Off operation
- Diffused lighting output
