

Motion-Activated Outdoor Security Flood Light

This motion-activated outdoor security flood light provides reliable illumination and enhanced security for residential and commercial properties. Featuring a durable construction and weather-resistant design, this flood light is built to withstand harsh outdoor conditions.

Overview

Reliable Outdoor Security Illumination

This motion-activated outdoor security flood light is designed to provide robust illumination for both residential and commercial environments. Engineered with a durable, weather-resistant construction, it is built to perform reliably even in harsh outdoor conditions. The integrated motion sensor enhances safety by automatically activating the light upon detecting movement, making it an ideal solution for driveways, walkways, and perimeter security.

Technical Specifications

Durability

Weather-resistant • Durable Construction

Adjustable Settings

- Motion sensitivity
- Activation duration

Sensor Type	Integrated Motion Sensor
