Overview

Smart Motion-Activated Illumination

This versatile LED puck light is designed for convenient, hands-free illumination in residential or commercial settings. Featuring both PIR motion detection and a CDS light sensor, the unit automatically activates only when motion is detected in low-light conditions, ensuring optimal energy efficiency. Its cordless, battery-operated design allows for flexible installation in kitchens, closets, hallways, and wardrobes without the need for complex wiring.

Technical Specifications

Installation Options

- 3M Adhesive
- Screw Mounting

Sensor Technology	PIR Motion Sensor, CDS Light Sensor
