

Motor Grader Transmission

This transmission is designed for heavy-duty motor graders used in road construction. It ensures efficient power transfer and reliable operation for grading and leveling tasks.

Overview

High-Performance Motor Grader Transmission

This heavy-duty transmission is engineered specifically for the PY180G motor grader, ensuring reliable power transfer for demanding road construction and maintenance tasks. Designed for durability and precision, it supports the robust frame and powerful engine requirements of modern grading operations. This component is essential for maintaining optimal maneuverability and efficient leveling performance across diverse terrain conditions.

Technical Specifications

Compatible Model	PY180G
Primary Application	Road Construction, Road Maintenance, Grading, Leveling

Key Features

Performance Highlights

180 HP

Series Class

Design Focus

- Robust construction for heavy-duty use
- Precision hydraulic control compatibility
- Enhanced maneuverability support
- Terrain-adaptive power delivery
