

Motor Magnetic Starter

This magnetic starter is designed for reliable motor control in industrial applications. It features a robust enclosure for protection against harsh environments and includes start and stop buttons for easy operation.

Product Overview

Industrial Motor Control

This magnetic starter is engineered for reliable motor control within demanding industrial environments. It features a robust, protective enclosure designed to withstand harsh operating conditions, ensuring longevity and safety. Equipped with integrated start and stop buttons, it offers intuitive operation for users, while built-in overload protection safeguards motors from damage caused by excessive current draw.

Technical Specifications

Control Features

- Start Button
- Stop Button
- Overload Protection

Electrical Ratings

Parameter	Requirement
Current Type	A.C. Only
Configuration	1-L1, 2-T1, 3-L2, 4-T2, 5-L3, 6-T3

Design Highlights

Robust Enclosure • Overload Protection • Industrial Grade

Suitable Applications

Apparel Machinery, Textile Machinery, Industrial Motors
