

Motor Start Capacitor 64-77uF 250V

This motor start capacitor is designed for machinery and industrial applications. It features a capacitance range of 64-77 μ F and is rated for 250V AC operation.

Product Overview

High-Performance Motor Starting Capacitor

This motor start capacitor is engineered for reliable performance in industrial machinery and electrical equipment. Featuring a capacitance range of 64-77 μ F and a 250V AC rating, it is built to handle the demanding requirements of electric motor startups. Its robust construction utilizes aluminum and bakelite or ABS shells, ensuring stability, low energy loss, and a compact, lightweight form factor.

Electrical Specifications

Capacitance Range

64 μ F

Min Capacitance

77 μ F

Max Capacitance

Rated Voltage

250 V

Operating Frequency

50/60Hz

Physical & Environmental

Key Features

- Small volume
- Light weight
- Large capacity
- Low loss
- Stable performance
- Double plug and cable leads

Operating Temperature

-40/+65°C

Shell Materials

Aluminum, Bakelite, ABS
