

Motor Tricycle Flatbed Cargo Box with Storage

This is a complete cargo box assembly for motor tricycles, featuring a robust flatbed design with integrated side and rear panels. It is constructed from durable materials and includes mounting brackets, rubber cushions, chains, and a lockable storage box.

Product Overview

Heavy-Duty Cargo Solution

This complete cargo box assembly is engineered specifically for motor tricycles, providing a robust flatbed platform for efficient goods transportation. The design features integrated side and rear panels for secure loading, complemented by a dedicated lockable storage box for tools or valuables. Built for durability, the assembly includes essential mounting hardware, rubber cushions, and chains to ensure reliable, long-lasting performance in demanding work environments.

Construction & Design

Included Components

- Mounting brackets
- Rubber cushions
- Security chains
- Lockable storage unit

Durability

Heavy-Duty • Industrial Grade

Design Features

Flatbed Design, Integrated Side Panels, Rear Tailgate, Lockable Storage Box

Usage

Primary Application

Commercial transport of goods and equipment on motor tricycles
