

Motor Tricycle Front Shock Absorber Assembly

This front shock absorber assembly is designed for motor tricycles. It features dual telescopic forks, upper and lower triple clamps, fork seals, fork bushings, headlight mounting brackets, and reflectors.

Overview

Performance and Stability

This front shock absorber assembly is engineered specifically for motor tricycles, providing essential suspension support for improved vehicle handling. The complete unit features a robust design including dual telescopic forks, triple clamps, and integrated mounting points for headlights and reflectors. It is built to ensure a smooth, controlled ride, enhancing both stability and driver comfort in various road conditions.

Technical Specifications

Included Components

- Dual telescopic forks
- Upper triple clamp
- Lower triple clamp
- Fork seals
- Fork bushings
- Headlight mounting brackets
- Reflectors

Component Type

Front Suspension • Shock Absorber Assembly

Application

Motor Tricycle
