

# Motorcycle Axle Assembly with Differential Housing

This motorcycle axle assembly is built for robust performance and lasting durability. It includes a central differential housing, brake drums, and strong wheel hubs.

## Product Overview

### Heavy-Duty Axle Assembly

This heavy-duty motorcycle axle assembly is engineered for robust performance and long-term durability. It features an integrated central differential housing designed to provide reliable power transmission across various riding conditions. With included brake drums and sturdy wheel hubs, this unit ensures smooth handling and consistent stopping power for demanding applications.

## Technical Specifications

### Key Components

- Central differential housing
- Integrated brake drums
- Reinforced wheel hubs

### Design Type

Heavy-Duty • Differential Integrated

## Performance Metrics

### Performance Focus

Power Transmission, Smooth Handling, Durability
