Product Overview

High-Performance Swingarm

This birdcage brace swingarm is engineered to significantly enhance the stability and handling of Monkey-type motorcycles. Featuring a specialized birdcage construction, the design maximizes structural rigidity while effectively minimizing unsprung weight. The reinforced brace helps reduce flex during operation, ensuring superior power transfer to the rear wheel for a more responsive riding experience.

Technical Specifications

Material	Aluminium Alloy
Compatible Type	Monkey
Key Features	Birdcage Design, Reinforced Brace, Lightweight, High Rigidity

Installation & Kit

Included Hardware

- Mounting bolts
- Bushings
- Installation hardware

Finish

Polished
