

Motorcycle Brake Caliper Piston Compressor Tool

This brake caliper piston compressor tool retracts brake caliper pistons for simpler brake pad replacement. It features a threaded spindle to apply controlled pressure and works with many vehicle models.

Product Overview

Professional Brake Service Tool

This brake caliper piston compressor tool is engineered to retract brake caliper pistons quickly and efficiently, streamlining the brake pad replacement process. Featuring a robust threaded spindle design, it allows for precise, controlled pressure application to ensure safe operation. Constructed from durable materials, this tool is built for long-lasting reliability, making it an essential addition to the toolkit of professional mechanics and dedicated DIY enthusiasts alike.

Technical Specifications

Mechanism	Threaded spindle
Primary Function	Brake caliper piston retraction
Ideal For	Professional Mechanics, DIY Enthusiasts

Compatibility

Vehicle Compatibility	Wide range of vehicle makes and models
