Product Overview

High-Performance Motorcycle Brake Calipers

This collection of motorcycle brake calipers is engineered for reliability and precise braking performance. Available in various configurations, these units cater to different mounting requirements, including both left and right-side positions. With diverse pitch joint dimensions, caliper diameters, and pad area specifications, these components are designed to integrate seamlessly into a wide range of motorcycle braking systems.

Technical Specifications

Model Specifications

Model ID	Position	Pitch Joint (mm)	Caliper Diameter	Pad Area (mm ²)
710182000	Left	45	∅30.2mm	1108
710042000	Left	65	∅34mm	1233
710092000	Right	45	∅30.2mm	1170
763152000	Left/Right	87.7	6 x 25mm	3162
817182000	Left	17	∅38.2mm	1512
710172000	Left	49	∅34mm	1484
724262000	Left	42.8	2-32mm	1072
710232000	Left	92.5	∅27mm	1090
714432000R	Right	53	∅42.8mm	1542
721358000	Right	85	2 x 25mm	1408
723982000	Left	84	2 x 32mm	1589
