

Motorcycle Brake Disc with Drilled Design

This high-performance motorcycle brake disc is designed for optimal stopping power and heat dissipation. It is constructed from durable materials and features a drilled design to reduce weight and improve cooling.

Overview

High-Performance Braking Solution

This motorcycle brake disc is precision-engineered to deliver optimal stopping power and consistent performance under various riding conditions. Featuring a strategic drilled design, it effectively reduces unsprung weight while enhancing heat dissipation for improved durability. Designed for a direct fit, this component is an ideal upgrade for riders seeking reliable and responsive braking.

Technical Specifications

Key Performance Benefits

- Enhanced stopping power
- Improved thermal management
- Weight reduction via drilled pattern
- Direct fit compatibility

Construction

Durable Material • Reliable Performance

Design Features

Drilled Design, High-Performance, Heat Dissipation, Precision Engineered
