

Motorcycle Carburetor Assembly

Complete carburetor assembly designed for motorcycle engines. It includes a throttle mechanism, fuel bowl, and adjustment screws for optimal engine performance and is made from durable metal and plastic.

Product Overview

High-Performance Carburetor Assembly

This complete motorcycle carburetor assembly is engineered to ensure optimal engine performance through precise fuel delivery. Featuring a robust construction of durable metal and plastic components, it is designed for long-lasting reliability in demanding conditions. The unit includes an integrated throttle mechanism and adjustable screws, allowing for fine-tuned engine calibration and ease of installation.

Technical Specifications

Assembly Features

- Integrated throttle mechanism
- Adjustable fuel mixture screws
- Precision fuel delivery system
- Durable fuel bowl construction

Installation

Easy Installation

Construction Materials

Durable Metal, High-Grade Plastic
