Product Overview

High-Performance CDI Ignition Coil

This high-performance CDI ignition coil is engineered to provide a strong and reliable spark, ensuring optimal engine performance for various motorcycle models. Designed for durability, the unit features a robust housing built to withstand harsh operating conditions, promoting long-lasting reliability. It serves as an ideal replacement for worn or damaged ignition components, helping to improve fuel efficiency and ensure consistent ignition timing.

Technical Specifications

Quality Assurance	100% Incoming Quality Control, 100% Mass Factory Inspection, Technical Standard Compliance
Application	Motorcycle Assembly

Logistics & Packing

Available Packaging

- Neutral packing
- Standard color box
- Customized box (Branded)
