

Motorcycle Clutch Friction Plate, 108mm Diameter

This motorcycle clutch plate features a 108mm outer diameter and 3.25mm thickness. It is designed to provide optimal performance and durability for various motorcycle models.

Product Overview

High-Performance Clutch Friction Plate

This motorcycle clutch friction plate is engineered for optimal performance and durability. Constructed from premium A-class rubber and cork-based material, it ensures smooth engagement and effective heat dissipation under demanding conditions. Designed with precision to meet rigorous industry standards, this component is suitable for a wide range of motorcycle models, offering extended service life and consistent reliability.

Physical Dimensions

Outer Diameter	108 mm
Inner Diameter	77.2 mm
Thickness	3.25 mm

Material & Quality

Certifications

ISO/TS16949

Material Composition

A-class rubber and cork-based material

Compatibility

Compatible Motorcycle Models

- CG125
- CG150
- GS125
- GN125
- RX125
- RS100
- YB100
- AX100
- CY80
- Y110
- GN250
- JH70
- BOXER
- PULSAR
