

Motorcycle Clutch Friction Plate

This motorcycle clutch friction plate is designed for optimal power transfer and durability. Constructed from high-quality friction materials, it provides reliable engagement and smooth shifting.

Product Overview

High-Performance Clutch Friction Plate

This motorcycle clutch friction plate is engineered for optimal power transfer and exceptional durability. Constructed from high-quality friction materials, it ensures reliable engagement and smooth shifting even under demanding conditions. Designed to withstand high temperatures, this component provides enhanced grip and reduced slippage, contributing to improved acceleration and a superior overall riding experience.

Technical Specifications

Application

Motorcycle • Clutch System

Model Compatibility

CG125

Performance Features

High-Temperature Resistance, Anti-Slippage, Smooth Shifting, Enhanced Grip
