

Motorcycle Clutch Friction Plate for GS125

This motorcycle clutch plate is designed for GS125 models. It features a 3.05mm thickness and a 127mm outer diameter.

Product Overview

High-Performance Clutch Friction Plate

This high-performance clutch friction plate is engineered for optimal power transfer and smooth engagement in GS125 and compatible motorcycle models. Manufactured using A-class rubber and cork-based materials, it offers superior heat resistance and consistent friction characteristics. Designed for durability and reliability, this component is suitable for both street and off-road riding conditions, ensuring an extended service lifespan.

Technical Dimensions

Outer Diameter	127 mm
Inner Diameter	96 mm
Thickness	3.05 mm

Material & Quality

Certifications

ISO/TS16949

Material Composition

A-class rubber and cork-based material

Compatibility

Compatible Models

- CG125
- CG150
- GS125
- GN125
- RX125
- RS100
- YB100
- AX100
