

Motorcycle Clutch Pressure Plate Assembly

This clutch pressure plate assembly is designed for Suzuki motorcycles. It ensures efficient power transfer from the engine to the transmission.

Product Overview

High-Performance Clutch Pressure Plate

This precision-engineered clutch pressure plate assembly is designed for reliable power transfer between the engine and transmission. Utilizing a durable metal housing and a high-tension diaphragm spring, this component ensures consistent performance under demanding riding conditions. It is built for smooth engagement and disengagement, providing longevity and efficiency for motorcycle drivetrain systems.

Technical Details

Core Functionality

- Efficient power transfer
- Optimized clutch engagement
- Smooth disengagement operation

Construction Materials

Durable Metal, Diaphragm Spring

Performance Metrics

Performance Standard

High Durability • Precision Manufactured
