Product Overview

High-Performance Control Cables

These motorcycle control cables are engineered for smooth, precise operation and long-term reliability. Designed with durable outer casings and low-friction inner wires, they ensure optimal responsiveness for throttle and speed monitoring systems. Each unit features adjustable fittings for seamless installation across a wide range of motorcycle models, making them an essential component for maintenance and repair.

Technical Specifications

Reference Part Numbers

- DM191005
- PM-12901-000

Available Cable Types

Throttle Cable, Speedometer Cable

Compatibility

Includes specific replacement options for AK-125 AKT models and universal adjustable fittings for various motorcycle models.
