

Motorcycle Digital Speedometer Assembly

This motorcycle speedometer assembly features indicators for turn signals and neutral gear. The dial displays vehicle speed in kilometers or miles per hour.

Overview

Precision Replacement Speedometer

This digital speedometer assembly is designed as a direct replacement for the CG125 Fan motorcycle model. It features a clear analog display ranging from 0 to 140 km/h and includes essential indicator lights for neutral and high beam status. The unit comes pre-wired with a standard connector, ensuring a straightforward and efficient installation process for maintenance or repair needs.
