Product Overview

High-Performance Drive Chains

These motorcycle drive chains are precision-engineered to deliver optimal power transfer and reliable performance across various riding conditions. Constructed from high-strength alloy steel with hardened pins and bushings, they offer exceptional resistance to wear and corrosion. Designed for longevity and smooth operation, these chains are suitable for a wide range of motorcycle applications, ensuring safety and durability for professional riders.

Technical Specifications

Construction Materials

- High-strength alloy steel
- Hardened pins
- Hardened bushings

Available Chain Types

O-Ring, X-Ring, Standard Roller Chain

Performance Features

Key Benefits

High Tensile Strength • Corrosion Resistant • Extended Wear Life • Smooth Power Transfer
