

Motorcycle Drive Chain

This motorcycle drive chain is engineered for efficient power transfer. It is constructed with durable steel components, ensuring longevity and reliable performance.

Product Overview

High-Performance Motorcycle Drive Chain

This high-strength motorcycle drive chain is precision-engineered for efficient power transmission and long-term reliability. Constructed with durable, heat-treated steel components, it features specialized rollers and side plates designed to minimize friction and ensure smooth operation. Suitable for a wide range of motorcycle models and riding conditions, this chain provides optimal performance and an extended service life.

Technical Specifications

Material Composition

Component	Material Grade
Plate	45Mn
Pin	30CrMnTi
Roller	20#

Available Colors

Nature • Blue • Golden

Available Models

420, 420H, 428, 428H, 520, 520H, 530, 630

Features & Services

Key Features

- High strength construction
- Heat treated for durability
- Precision-engineered components
- Reduced friction design

Service Options

OEM Available, Timely Delivery
