Product Overview

High-Performance Motorcycle Drive Chain

This 428H motorcycle drive chain is engineered for durability and reliable power transmission. Constructed from high-grade 40Mn alloy steel and subjected to advanced heat treatment, it offers enhanced resistance to wear and stretching. Designed for smooth operation and reduced friction, this component is an ideal choice for maintaining optimal motorcycle performance.

Technical Specifications

Item Number	MG-A09-025
Chain Size	428H
Chain Length	120 Links

Material & Construction

Material	Alloy Steel (40Mn)
Manufacturing Process	Advanced Heat Treatment

Ordering Information

Manufacturing Capabilities	Yes
