

Motorcycle Drive Sprocket

This motorcycle drive sprocket is designed to transmit power from the engine to the rear wheel. It is constructed from durable metal with weight-saving cutouts.

Product Overview

Precision Engineered Drive Sprocket

This high-performance motorcycle drive sprocket is designed to efficiently transmit power from the engine to the rear wheel. Featuring a robust metal construction with strategic weight-saving cutouts, it balances durability with performance. The precision-cut teeth ensure optimal engagement with the motorcycle chain for smooth power delivery.

Physical Dimensions

Outer Diameter	20 cm
----------------	-------

Construction & Material

Material	Steel/Aluminum Alloy
Design Features	Weight-saving cutouts, Precision teeth, Multi-bolt mounting

Compatibility

Application	Rear Wheel • Motorcycle Drivetrain
-------------	------------------------------------
