

Motorcycle Drum Brake Assembly

This motorcycle drum brake assembly is designed for CG125-A models. It features a robust construction with a cast aluminum housing and a mechanically actuated brake lever.

Product Overview

High-Performance Drum Brake Assembly

This motorcycle drum brake assembly is engineered specifically for CG125-A models, offering a robust solution for reliable stopping power. Featuring a durable cast aluminum housing and mechanical actuation, it ensures consistent performance across various riding conditions. The design prioritizes efficient heat dissipation and long-lasting durability, making it an essential component for effective wheel braking systems.

Technical Specifications

Compatible Model

CG125-A

Housing Material

Cast Aluminum

Actuation Mechanism

Mechanical

Included Components

Kit Contents

- Brake shoes
- Springs
- Installation hardware

Application

Wheel Position

Front Wheel, Rear Wheel
