

Motorcycle Drum Brake Assembly

Motorcycle drum brake assembly designed for reliable stopping power. It includes brake shoes, springs, and an adjuster mechanism mounted on a backing plate.

Overview

Reliable Drum Brake Solution

This motorcycle drum brake assembly is engineered for consistent and reliable stopping power. The unit comes fully equipped with essential components, including brake shoes, tension springs, an adjuster mechanism, and a brake cylinder, all pre-mounted on a durable backing plate. Designed for ease of installation, this assembly is an ideal replacement or maintenance solution for various motorcycle models utilizing drum brake systems.

Technical Specifications

Included Components

- Brake shoes
- Tension springs
- Adjuster mechanism
- Brake cylinder
- Backing plate

Brake System Type

Drum Brake • Mechanical/Hydraulic

Application Compatibility

Motorcycle, Replacement Part, Standard Drum Systems
