

Motorcycle Drum Brake Hub Assembly

This motorcycle drum brake hub assembly is designed for the rear wheel. It incorporates brake shoes and a lever arm for brake actuation.

Product Overview

High-Performance Drum Brake Hub Assembly

This motorcycle drum brake hub assembly is engineered for reliable stopping power and durability. Designed for rear-wheel integration, it features a robust cast aluminum housing that balances lightweight construction with high structural integrity. This assembly comes complete with integrated brake shoes and an actuation lever, making it a comprehensive solution for maintenance or restoration projects.
