

Motorcycle Electronic Ignition Unit

This electronic ignition unit is designed for motorcycles. It provides reliable spark timing and ignition control for optimal engine performance.

Product Overview

High-Performance Electronic Ignition

The YDD_009 electronic ignition unit is engineered to provide precise spark timing and reliable ignition control for motorcycle engines. Featuring a compact, durable black housing, this unit ensures seamless integration into existing electrical systems via a multi-pin connector. It is an essential component for optimizing engine performance and maintaining consistent ignition reliability under various riding conditions.

Technical Specifications

Connectivity

- Multi-pin primary connector
- Single-pin auxiliary connector

Model Identifier

YDD_009

Compatibility

Motorcycle Ignition System, Electronic Spark Control
