

Motorcycle Engine

This motorcycle engine is designed to provide reliable power for a range of motorcycle models. It features a four-stroke, single-cylinder configuration suitable for smaller motorcycles and scooters.

Overview

High-Performance Single-Cylinder Engine

This four-stroke, single-cylinder motorcycle engine is engineered for reliability and efficient power delivery in smaller motorcycles and scooters. Featuring optimized cooling fin geometry, it ensures effective thermal management during operation. This unit is designed as a complete, ready-to-integrate powertrain solution for various small-displacement vehicle applications.

Technical Specifications

Cooling System

Air-cooled

Included Components

- Cylinder head with cooling fins
- Engine block
- Starter motor
- External housings and covers

Engine Configuration

Single-cylinder, four-stroke
