

Motorcycle Engine Assembly

Single-cylinder, four-stroke engine designed for motorcycles. It is air-cooled and features a horizontally oriented cylinder layout.

Overview

High-Performance Three-Wheeler Engine Assembly

This specialized engine assembly is engineered specifically for three-wheeled vehicles, featuring a robust centrifugal boron cast iron cylinder for enhanced durability. The system includes a high-performance 5-group, 6-piece carbon fiber clutch and a specialized M2 transmission ratio to optimize power delivery. Designed for reliability and reduced noise, it comes fully equipped with essential components including the carburetor, starting arm, and electrical system.

Technical Specifications

Color	Grey
Transmission Ratio	M2 (Three-Wheeler Special)
Mute System	Pipe Field Mute System

Engine Construction

Cylinder Material	Centrifugal Boron Cast Iron
Cylinder Design	Cast Iron 4-Hole Triangle
Needle Roller Type	Lido
Piston Ring Configuration	Double PVD Ring

Clutch System

Clutch Specification	5 Groups of 6-Piece Carbon Fiber
Reinforcement	Embedded Steel Sheet

Included Components

Included Accessories

- Carburetor Intake Pipe
- Variable Speed Pedal
- Starting Arm
- Four Electrical Components
- Kunfu Carburetor

Compatibility

Vehicle Compatibility	Three-Wheeler, Motorcycle
