

Motorcycle Engine Cam Chain Kit

This motorcycle cam chain kit enhances engine performance. It features a chromizing heat treatment for improved durability and includes a cam chain, guide wheel, and tension pulley.

Product Overview

High-Performance Cam Chain Kit

This high-performance motorcycle cam chain kit is engineered for improved durability and superior engine performance. Featuring a specialized chromizing heat treatment, the chain's core strength is significantly enhanced to extend its operational lifespan. The kit provides a comprehensive solution for engine maintenance, including the cam chain, guide wheel, and tension pulley.

Technical Details

Included Components

- Cam Chain
- Guide Wheel
- Tension Pulley

Chain Type

25H-88L

Maintenance & Safety

Important Installation Note

The longevity of your cam chain is directly dependent on the condition of the surrounding components. Damaged guide wheels and tension pulleys must be replaced, as they will severely shorten the chain's life and compromise engine performance.

Key Features

Performance Features

Chromizing Heat Treatment, Core Strength Enhancement, Extended Lifespan
